

# ENERGY MEDICINE IN SURGERY

Healing Touch Worldwide Conference  
Post Conference workshop  
on Monday, August 9th

by Janna Moll, MSN, HTCP/I, SEM

Janna Moll, a Healing Touch Program (HTP) Level 1-5 Instructor, Certification Reviewer, Ethics Committee member, and instructor for the Mentor Training courses, will teach this full day workshop that includes discussion, technique and scheduling options around surgical support of an energy treatment (HT) client. Tuition for this workshop includes a workbook and a field trip!

## DO YOU WANT TO KNOW?

How many sessions are recommended for surgical client support? What should be covered in each of these sessions? How to arrange to be in surgery? Is surgery the right practitioner path of support? Are you comfortable going into surgery? What are you to do in surgery? What are you to do if you are not in surgery? How do you work with the hospital staff?

How long do you stay at the hospital and why? Can the work be done long distance? How many sessions (and when) post-surgery? What HT techniques are beneficial? How to get hospital approvals? How to present HT to the medical world?

## WHAT ELSE DO YOU LEARN?

Learn the "Really Really" technique, and know when to utilize it to process through emotions with a 'stuck' client. Learn a variation of the Really, Really Technique to use with children and infants. Learn about presenting the surgical journey as a vision quest.

## FIELD TRIP? Really? WHAT FUN!

In the afternoon we will take a field trip to University of Colorado Hospital - Anschutz Medical Campus and have a tour with the BURN UNIT staff. We will change into scrubs, masks and shoe covers and tour the pre-op, surgery and post-op rooms used for surgeries with the burn patients. As well as, having a group photo taken!

## WHO CAN TAKE THIS POST CONFERENCE?

Students, practitioners, instructors and medical personnel! Contact the HTP Office and register now. Class size is limited because of the field trip.

## About the author:

Janna Moll, MSN, HTCP/I, SEM is the founder and president of Energy Medicine Specialists, a business offering hands-on healing, consulting on accreditation in health care, and advanced coursework for energy medicine practitioners.
